SUMMARY

Passionate and self-driven Computer Science undergraduate with hands-on experience through impactful internships at IBM, Sedai, IITM Pravartak, and DCUBE Ai, contributing to real-world projects in performance benchmarking, system monitoring, and full-stack development. Skilled in Python, AWS, Django, distributed systems, and Data Structures and Algorithms (DSA). Strong problem-solving abilities and a commitment to continuous learning, with the goal of contributing meaningfully to innovative tech teams and challenging projects.

EDUCATION

TKM College of Engineering Kollam, Kerala, India	2022 - 2026
B. Tech in Computer Science and Engineering with honors in ML CGPA: 9.26	
Jawahar Navodaya Vidyalaya Trivandrum, Kerala, India	2020 - 2022
CBSE 12 th grade in Computer Science (95.8%)	

EXPERIENCE

IBM Private Ltd. — Delivery Consultant Intern	Jan 2026 – Present
Health Check Asset	
- Developing a health check asset for the organization.	
IITM Pravartak Technologies — Developer Intern (GitHub Link)	July 2025 – Jan 2026
PostgreSQL Extension	
- Developed an extension on PostgreSQL for adding contact details of superusers of a database.	
Sedai Inc. — Research Intern	June 2025 – July 2025
Application Performance Benchmarking Across AWS Fargate Buckets	
- Conducted performance benchmarking of containerized applications across multiple AWS Fargate buckets, analyzing startup time, latency, and throughput under varying deployment scenarios to evaluate consistency and variability.	
IITM Pravartak Technologies — Developer Intern (GitHub Link)	Feb 2025 – May 2025
PostgreSQL Security & Monitoring System	
- Design and build a security and performance monitoring system for PostgreSQL integrating Prometheus and Grafana.	

PROJECTS

GitChat (2026) (GitHub Link)
Developed a branching conversation interface for AI chat interactions with RAG capabilities. GitChat allows to explore multiple conversation paths simultaneously, visualize conversation trees, upload documents, and manage chat history with an intuitive UI.
Comparative Benchmarking and Recommendation System for Cloud VM Implementations (2026) (GitHub Link)
Built a workload-aware multi-cloud VM recommendation system using Bayesian Optimization and contextual bandit reinforcement learning to optimize cost-performance selection across Amazon Web Services, Microsoft Azure, and Google Cloud Platform.
CareNexus (2024) (GitHub Link)
Built a full-stack healthcare management platform using Django, ReactJS, and PostgreSQL for persistent storage. Enabled secure, real-time communication and appointment scheduling.

TECHNOLOGIES AND SKILLS

Languages: Python, C, Java, JavaScript, SQL
Frameworks & Libraries: Django, ReactJS, Tailwind CSS.
Tools & Platforms: Linux (Ubuntu), Windows, Prometheus, Grafana, Git, Git LFS, AWS, Docker.
Databases: PostgreSQL, MySQL, Oracle.
Concepts: Distributed Systems, Cloud Computing, Machine Learning, REST APIs, Full-stack Development, DevOps.
Soft Skills: Leadership, Problem Solving, Creative Thinking, Independent Learner.

AWARDS

- Qualified GATE 2025 in Computer Science.
- Merit Certificate for attaining highest marks in Mathematics in AISSE, 2020.
- Secured First position in KTU (B)ZONE Table Tennis Tournament (2024, 2025).

LEADERSHIP

- Web Team ACM TKMCE (2024)
- House Captain (2020-2022)
- Coordinator (2024) of BGMI Tournament conducted as part of Hestia'24.
